## St Joseph's BYODD Guide Sheet

We have an iPad, what do we do now?

1. If your iPad is brand new, take it out of the box, power up and follow the on screen instructions. If you are new to Apple products, use the link below to assist you.

If you already have your own iPad follow the instructions from here.

For the safety of the iPad please ensure it is placed in a quality case. We recommend that the case protect the corners and prevent the screen from making contact with a flat surface when face down.

2. Create an Apple ID for the student. We highly recommend using family sharing. Should you experience difficulties using school details in the setup process, please feel free to use your own. Use the link below to assist you.

3. Download the app Mobileiron. Once you have downloaded the app, carefully follow the instructions in the 'Setting up Mobileiron' document. It contains all the required details to complete the process. Each student's school username and password were handed out Monday on a small strip of paper. Use the link below to assist you.

This process automatically sets up the students' email and school WiFi settings, hence allowing them to use the iPad at school. It is also the management system we will use to send out paid apps. Please note steps 22 and onwards are not required at this stage.

4. Download and install the following **FREE** apps:

 Edmodo	 Moblieiron	 InstaCollage	 Prezi	 Evernote
 Sketch	 Nearpod	 Popplet Lite	 My Script Calculator	 QR Reader

5. Bring the iPad to school. Each morning Years 5 and 6 will place their bags inside the Hall, next to the Canteen, for safety.

Please note that students will not be asked to purchase any apps and teachers will notify families, via email, of any apps the students will be asked to download.
